SmartV Solo Accessories

SmartV Solo Accessories

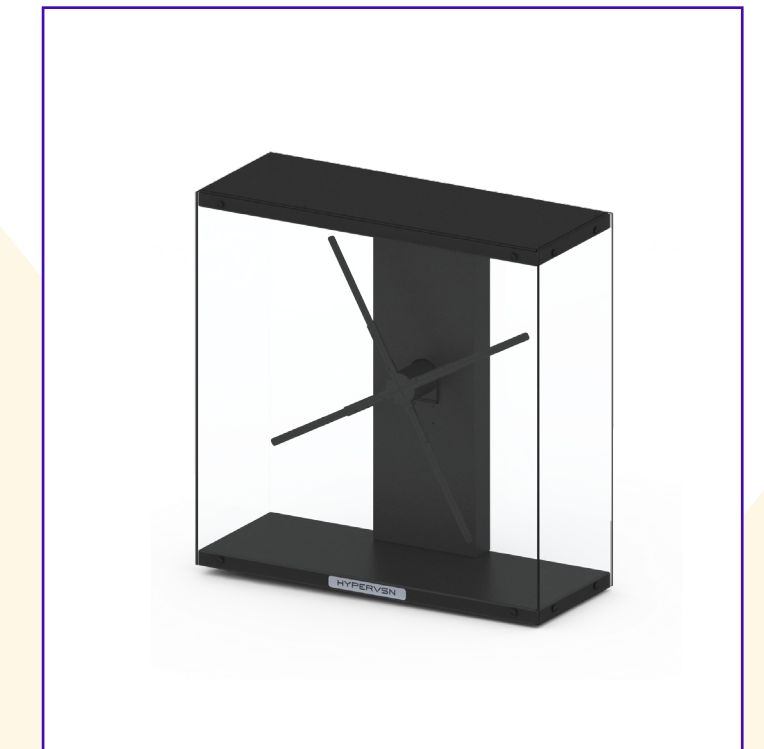

With our range of SmartV Solo Accessories and installation solutions you can create the perfect holographic display in any environment. Designed to expand your installation opportunities and bring a new level of convenience and versatility to your set up. These accessories offer you everything from floor stands and ceiling mounts to portable solutions, and protective Domes and Cubes for various installations.

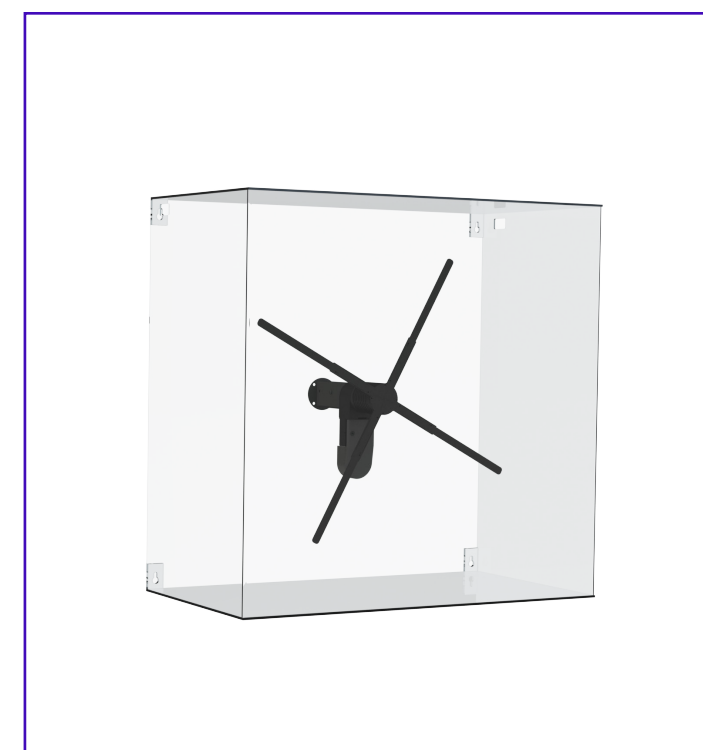

HYPERVSN SmartV Tripod

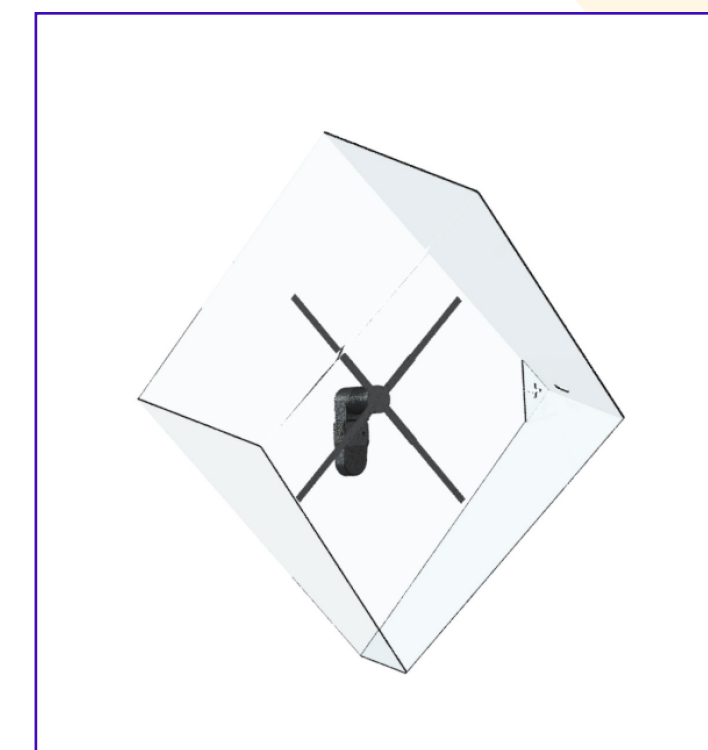

HYPERVSN SmartV Ceiling Mount

HYPERVSN SmartV Glass Box

HYPERVSN SmartV Cube Regular

HYPERVSN SmartV Cube Shift

HYPERVSN SmartV Dome

HYPERVSN SmartV Dome Ultra

HYPERVSN SmartV Tripod

Elevate installations with the telescopic HYPERVSN SmartV Tripod, allowing single HYPERVSN SmartV Solo to be displayed at a height of 1.3 m – 2.2 m above the ground. SmartV Tripod is minimal in design and made with portability in mind with its lightweight construction. It can easily be transported, shipped, and is the perfect standalone installation solution for HYPERVSN SmartV Solo M and L. SmartV Tripod can be used in conjunction with HYPERVSN Domes.

Key features

-  Telescopic with adjustable height (1.3 m – 2.2 m)
-  Lightweight and highly portable
-  Quick installation and assembly
-  Perfect for product demos, meetings and events

Specifications

- Compatibility:** HYPERVSN SmartV Solo M and L
- Accessory compatibility:** HYPERVSN SmartV Dome M and L
- Weight:** 10 kg / 22 lbs (w/o display)
- Height:** 131 cm – 226 cm (w/o display)
- Base diameter:** 72 × 66 cm / 28.3 × 25.9”

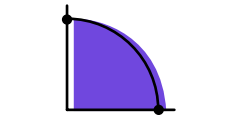

HYPERVSN SmartV Ceiling Mount

Suspend HYPERVSN SmartV Solo display from the ceiling and create the perfect high-visibility solution for audiences. HYPERVSN SmartV Ceiling Mount, with its telescopic, lightweight construction, is easy to install and allows users to adjust its height and angle of inclination. This accessory can be easily shipped and is compatible with HYPERVSN Domes. Redefine traditional installations by seizing the largest unoccupied activation area available – overhead space.

Key features

-  Increases device impact over distance
-  Adjustable height and device angle
-  Lightweight and easy to install
-  Perfect for retail, hospitality or corporate spaces

Specifications

Compatibility: HYPERVSN SmartV Solo M and L

Accessory compatibility: HYPERVSN SmartV Dome M and L

Weight: 3 kg / 6.6 lbs (w/o display)

Length: 101 cm – 136 cm / 39.7” – 53.5” (w/o display)

HYPERVSN SmartV Glass Box

Robust and elegant, the protective HYPERVSN SmartV Glass Box is minimal in design with antiglare front glass, transparent side walls, and dark top and bottom surfaces. The background enhances the 3D visual effects, while the antiglare front glass allows for minimal image distortion. This makes it the ideal installation display for shop-front tables, bar counters and any other flat horizontal surfaces.

Key features

-  Antiglare front glass with minimal image distortion
-  Increased brightness and scratch resistance
-  Portable, lightweight and provides protection
-  Perfect for retail, bars and receptions

Specifications

HYPERVSN SmartV Glass Box M

Compatibility: HYPERVSN SmartV Solo M

Weight: 24 kg / 52.9 lbs (w/o display)

Dimensions: 66.5 cm × 66.5 cm × 30 cm /
26.2" × 26.2" × 11.8"

HYPERVSN SmartV Glass Box L

Compatibility: HYPERVSN SmartV Solo L

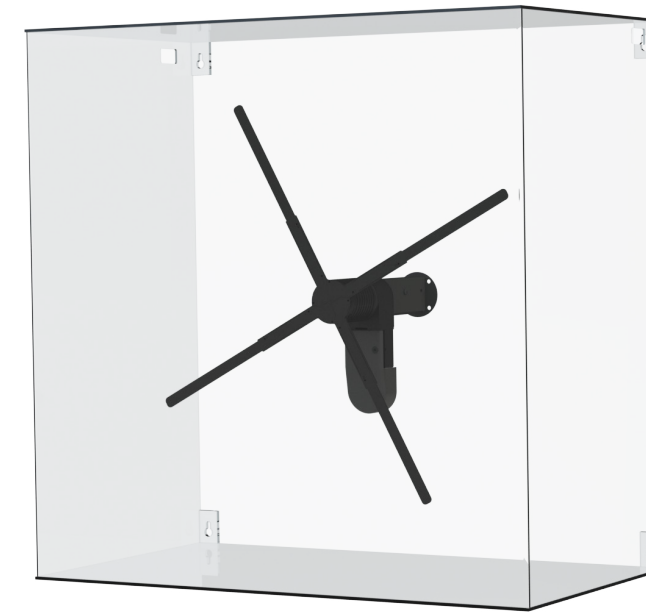

Weight: 35 kg / 77.2 lbs (w/o display)

Dimensions: 91.8 cm × 86.1 cm × 30.7 cm /
36.1" × 33.9" × 12.1"

HYPERVSN SmartV Cube Regular

Install HYPERVSN SmartV Solo M on a horizontal surface like a wall within a protective enclosed transparent cube. This is the perfect solution for permanent installations and allows for the display to be at eye level within audience reach. Bring a 3D element to life on a flat vertical surface and enhance the holographic effect of the HYPERVSN SmartV Solo. HYPERVSN SmartV Cube Regular is perfect for retail walls, lobbies, meeting rooms, behind a bar counter or on any wall where you want to grab attention.

Key features

-  Minimalistic design to enhance 3D effect
-  Protect your display in high traffic areas
-  Bring 3D element to a Flat vertical surface
-  Perfect for retail walls, lobbies, meeting rooms, or any wall

Specifications

HYPERVSN SmartV Cube Regular M

Compatibility: HYPERVSN SmartV Solo M

Weight: 6 kg / 13.2 lbs (w/o display)

Length: 70 cm × 70 cm × 39 cm /
27.5" × 27.5" × 15.3"

HYPERVSN SmartV Cube Regular L

Compatibility: HYPERVSN SmartV Solo L and M

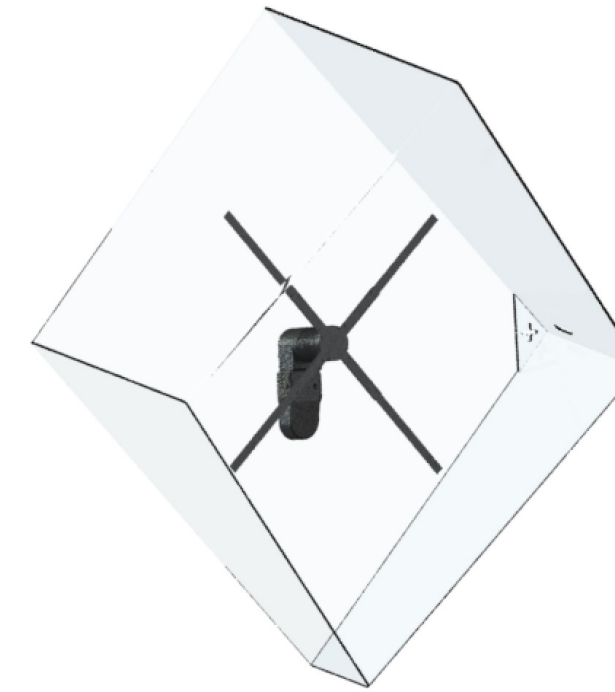

Weight: 10 kg / 22 lbs (w/o display)

Length: 91 cm × 91 cm × 45 cm /
35.8" × 35.8" × 17.7"

HYPERVSN SmartV Cube Shift

Create interest and draw audience attention with HYPERVSN SmartV Cube Shift. This installation solution is brilliant when mounting HYPERVSN SmartV Solo M or L high on a wall allowing for better visibility from below with the inclination angle of the front side. The cube is completely transparent, except for the side mounted on the wall, allowing the 3D display to captivate the viewer, and be seen at a distance, across the room. Astonish your audience with HYPERVSN SmartV Cube Shift.

Key features

-  Draws attention
-  Enhances the 3D Effect
-  Protect your display in high traffic areas
-  Perfect for elevated installations

Specifications

HYPERVSN SmartV Cube Shift M

Compatibility: HYPERVSN SmartV Solo M

Weight: 6 kg / 13.2 lbs (w/o display)

Length: 70 cm × 70 cm × 45 cm /
27.5" × 27.5" × 17.7"

HYPERVSN SmartV Cube Shift L

Compatibility: HYPERVSN SmartV Solo L and M

Weight: 9 kg / 19.8 lbs (w/o display)

Length: 91 cm × 91 cm × 45 cm /
35.8" × 35.8" × 17.7"

HYPERVSN SmartV Dome

Explore new installation opportunities with the HYPERVSN SmartV Dome. This accessory safeguards HYPERVSN SmartV Solo M (56 cm) or L (75 cm) displays in a protective transparent shield, allowing devices to be placed within reach of audiences. HYPERVSN SmartV Dome is easy to mount and the minimalistic design draws the viewers' attention to the display without detracting from the holographic effect.

Key features

-  Minimalistic design
-  Safer for installations within audience reach
-  Scratch and damage resistant
-  Easy to mount or use in conjunction with other accessories

Specifications

Accessory compatibility: HYPERVSN SmartV Ceiling Mount and HYPERVSN SmartV Tripod

Thickness: 4 mm / 0.16"

HYPERVSN SmartV Dome M

Compatibility: HYPERVSN SmartV Solo M

Weight: 6.5 kg / 14.3 lbs (w/o display)

Dimensions: 76 cm / 29.9". **Depth to surface:** 38 cm / 14.96"

HYPERVSN SmartV Dome L

Compatibility: HYPERVSN SmartV Solo L and M

Weight: 10.5 kg / 23.1 lbs (w/o display)

Diameter: 98 cm / 38.6". **Depth to surface:** 48 cm / 18.9"

HYPERVSN SmartV Dome Ultra

HYPERVSN SmartV Dome Ultra is sleek, yet grand in design. It creates the impression of an enhanced 3D effect, and the visuals displayed within appear to be enlarged (to the human eye). This transparent shield only sits 27 cm off any installation Wall – making it fit easily into almost any interior space as a fixed installation.

Key features

-  Premium Minimalistic design
-  Creates the impression of an enhanced 3D effect
-  Visuals displayed appear enlarged
-  Design protects devices while enhancing interior spaces

Specifications

Compatibility: HYPERVSN SmartV Solo L and M

Weight: 10.5 kg / 23.1 lbs (w/o display)

Diameter: 137.5 cm / 54.1”

Thickness: 4 mm / 0.16”

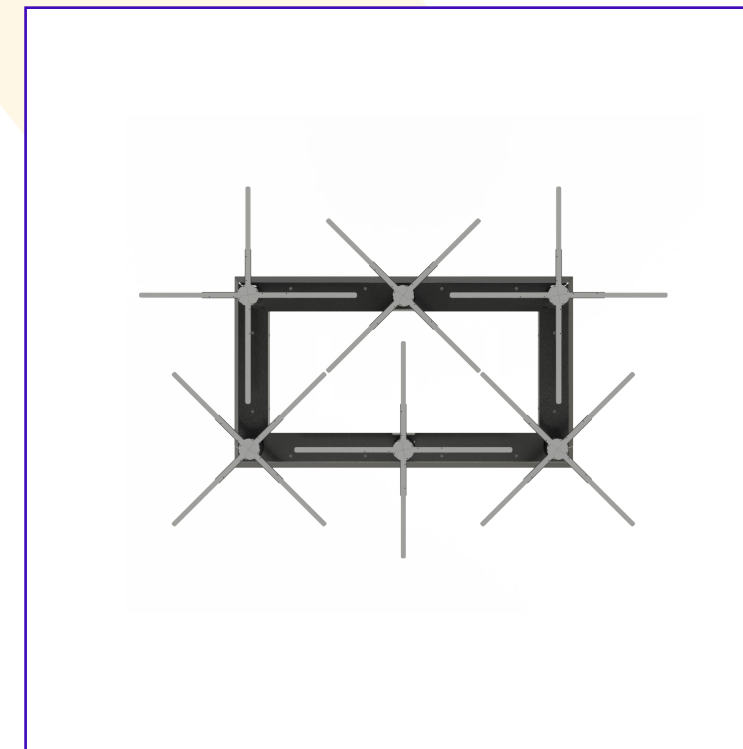

Depth to surface: 39 cm / 15.6”

SmartV Wall Accessories

SmartV Wall Accessories

Unlock the full potential of HYPERVSN Wall with this custom range of Wall accessories. Whether you are looking for a protective screen, an alternative mounting solution or just a quicker way to install the Wall, these accessories will provide everything you need to complete your installation with ease. Bring a new level of convenience and versatility to your set up without compromising your audience's viewing experience.

HYPERVSN SmartV Plex Guard 12

HYPERVSN SmartV Rack

HYPERVSN SmartV Frame

HYPERVSN SmartV Frame is an integral part of HYPERVSN SmartV Wall and comes in both M and L sizes, providing the sturdy framework that creates the Wall. This fundamental installation structure provides the perfect spacing and alignment needed to easily install a Wall. It is modular in design and can be scaled with the HYPERVSN SmartV Frame Extender. It is made with high quality, durable material ensuring HYPERVSN SmartV Wall M and L can be maintained with ease.

Key benefits

-  Integral framework of HYPERVSN SmartV Wall M and L
-  Install, scale, and maintain with ease
-  Vertical and horizontal installation
-  Compatible with universal VESA mounts

Specifications

Compatibility: HYPERVSN SmartV Wall M/L

Accessory compatibility: HYPERVSN SmartV Extender M/L and HYPERVSN SmartV Plex Guard M/L (6/9/12)

HYPERVSN SmartV Frame M

Weight: 17.5 kg / 38.5 lbs (w/o displays)

Dimensions: 92 cm × 52 cm × 12 cm / 36.2" × 20.5" × 4.7"

HYPERVSN SmartV Frame L

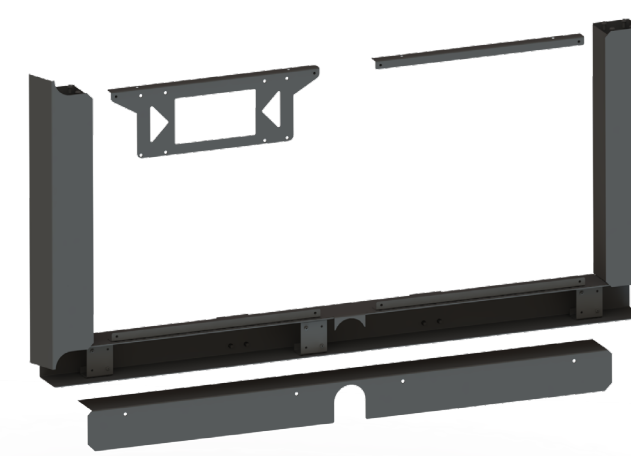

Weight: 27 kg / 23.1 lbs (w/o displays)

Dimensions: 118 cm × 65 cm × 18 cm / 46.5" × 25.6" × 7.1"

HYPERVSN SmartV Frame Extender

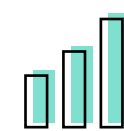

This installation accessory is modular in design, allowing for Walls of any size and configuration to be easily created. One HYPERVSN SmartV Frame Extender allows for 3 additional HYPERVSN SmartV displays M/Ls be added to standard HYPERVSN SmartV Frame which holds 6 displays. These can be used in a vertical or horizontal configuration and provide the perfect spacing and alignment for the additional displays.

Key benefits

Extends the HYPERVSN SmartV Wall M/L to any size

Modular in design allowing for scalability

Install, scale, and maintain with ease

Vertical and horizontal installation

Specifications

Compatibility: HYPERVSN SmartV Wall M/L

Accessory compatibility: HYPERVSN SmartV Frame and HYPERVSN SmartV Plex Guard (9/12)

HYPERVSN SmartV Frame Extender M

Weight: 11 kg / 25 lbs (w/o displays)

Dimensions: 92 cm × 48 cm × 12 cm / 36.2" × 18.9" × 4.7"

HYPERVSN SmartV Frame Extender L

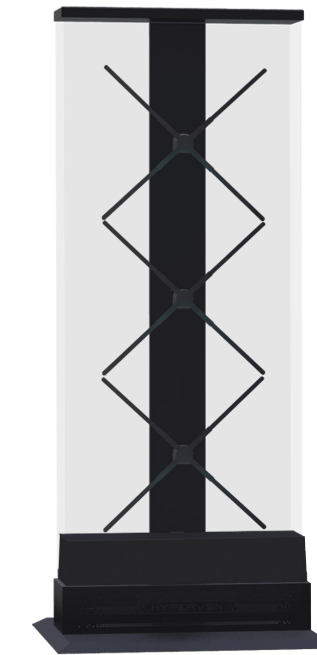

Weight: 14 kg / 30.8 lbs (w/o displays)

Dimensions: 118 cm × 60 cm × 18 cm / 46.5" × 23.6" × 7.1"

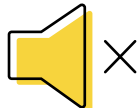

HYPERVSN SmartV Glass Box L3

This full protection installation solution is made for HYPERVSN SmartV Wall M L in a 3×1 configuration. It is perfect for displaying HYPERVSN SmartV Holographic Human or content on 3 HYPERVSN SmartV L displays arranged in a vertical configuration. The Glass Box allows the solution to be used in high traffic areas, protecting the solution and reducing the noise level.

Key benefits

-  Full 360 protection
-  Reduces noise level
-  Use in high traffic areas
-  Perfect for Holographic Human

Specifications

Compatibility: HYPERVSN SmartV Wall L

Weight: 135 kg / 297.6 lbs

Dimensions: 2250 cm × 880 cm × 340 cm /
885.8" × 346.5" × 133.9"

HYPERVSN SmartV Wall Portable HH

The perfect solution to display 3D content in a vertical set-up including HYPERVSN SmartV Holographic Human. This high-quality stand provides maximum mobility and easy setup of 3 HYPERVSN SmartV L displays vertically. Display 3D content from near ground-level to 1.6 meters above the ground on this single premium stand. Use HYPERVSN SmartV Wall Portable at any event, or in a corporate or retail space, to showcase captivating 3D visuals that look like they are floating in the air.

Key benefits

-  Quick installation and assembly
-  Highly mobile with leveling wheels
-  Perfect for life-size Holographic Human display
-  Vertical display from near ground level to 1.5 meters

Specifications

Device compatibility: HYPERVSN SmartV Wall L

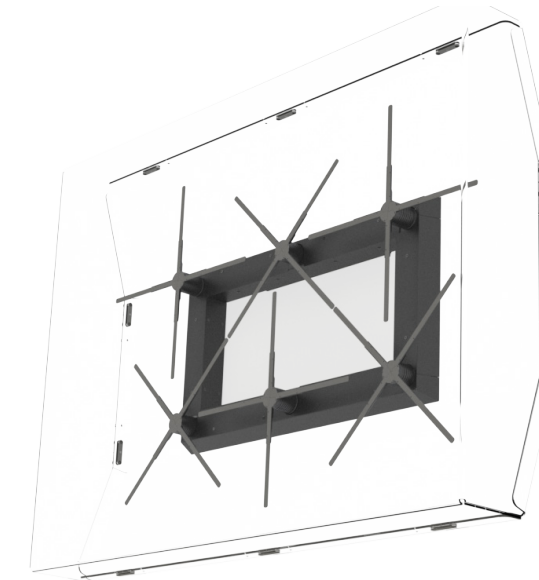

Weight: 28 kg / 62 lbs (w/o display)

Dimensions: 159 cm × 73 cm × 92 cm /
62.6" x 28.7" x 36.2" (w/o display)

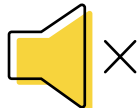

HYPERVSN SmartV Plex Guard 6

This full protection installation solution is made for HYPERVSN SmartV Wall M and L in a 3x2 configuration. It can be mounted directly onto a vertical surface (like a wall) with the included HYPERVSN SmartV Frame, while reducing the noise level, making it the perfect solution for permanent installations. HYPERVSN SmartV Plex Guard 6 will protect your display from all sides, allowing HYPERVSN SmartV Wall to be used in high traffic areas.

Key benefits

-  Full 360 protection
-  Reduces noise level
-  Extend the lifespan of HYPERVSN SmartV Wall
-  Perfect for high traffic areas

Specifications

Compatibility: HYPERVSN SmartV Wall M/L

HYPERVSN SmartV Plex Guard M6

Weight: 51 kg / 112 lbs

Dimensions: 159 cm × 120 cm × 32 cm /
62.6" × 47.2" × 12.6"

HYPERVSN SmartV Plex Guard L6

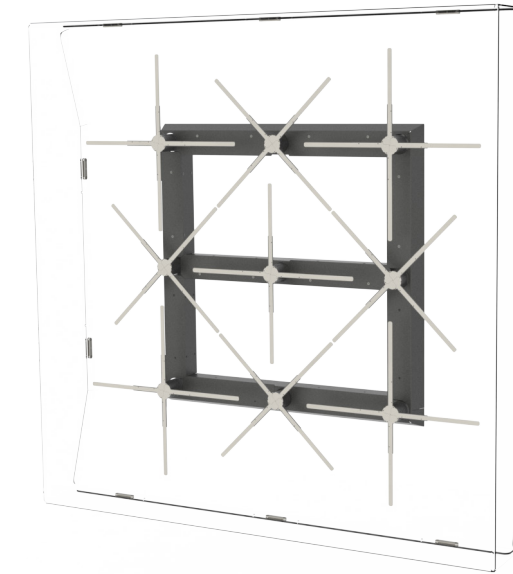

Weight: 80 kg / 175 lbs

Dimensions: 196 cm × 143 cm × 32 cm /
77.2" × 167.3" × 12.6"

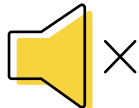

HYPERVSN SmartV Plex Guard 9

The perfect full protection installation solution for HYPERVSN SmartV Wall M and L in a 3x3 square configuration. This solution is ideal for permanent installations and can be mounted directly onto a vertical surface like a wall, using the included HYPERVSN SmartV Frame. It reduces the noise level and can be installed in high traffic areas, providing protection for your display from all sides.

Key benefits

-  Full 360 protection
-  Reduces noise level
-  Extend the lifespan of HYPERVSN SmartV Wall
-  Perfect for high traffic areas

Specifications

Compatibility: HYPERVSN SmartV Wall M/L

HYPERVSN SmartV Plex Guard M9

HYPERVSN SmartV Rack

Looking to create Walls of epic proportions to stun your audience? HYPERVSN SmartV Rack is the perfect solution to create HYPERVSN SmartV Walls of virtually any size. Its modular design makes installation quicker and easier on any flat surface with accurate spacing for the displays. This high-quality, durable rack makes the holographic content on the HYPERVSN SmartV Wall the only focus, drawing in customers and converting sales.

Key features

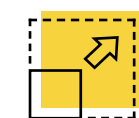

Modular design

High-quality materials

Assists with installation and maintenance

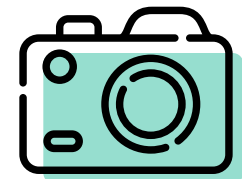

Create large scale SmartV Walls with ease

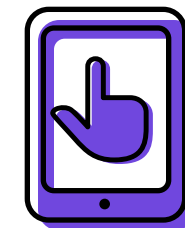

HYPERVSN SmartV Interactive Add-ons

Interactive add-ons allow you to create next-level holographic solutions to increase engagement and maximise the impact. Create holographic experiences that leave your audience speechless with innovation on another dimension.

Camera based control

Display content based on the viewer's demographic (Gender, Age, Emotions, Gestures) and switch your content to target content to specific audiences maximising the impact.

Tablet control

Allow users to control the holographic display through a tablet. Users can swipe through content like a 3D Catalogue or present 3D content in a meeting by swiping through content on the tablet.

Voice control

Display content based on voice prompts by recognizing what a customer is saying and playing the corresponding content. This allows for holographic assistants and Chatbots.

External triggers

Create next-level engagement by controlling your holographic display with external triggers like sensors (motion sensor, proximity sensor) or data from the internet (time, geography, temperature).
